EDUCATION

University of Washington – Seattle | Computer Engineering, B.S; Currently Junior Standing | 4.0 GPA | Expected Jun. 2028
Greenwood High Intl. School – Bangalore | IB Diploma 43/45; IGCSE A* in all subjects | Aug. 2021 – Jun. 2025

PROGRAMMING SKILLS

Python, OpenAI API, OpenCV, spaCy, Pandas, Git, Java, JavaScript, React.js, React Native, Flask, Node.js, Streamlit, SQL

WORK EXPERIENCE & PROJECTS

TuneShift - Chrome Extension | Jun. 2024 – Present

- Developed browser extension enabling real-time pitch/speed control of YouTube videos using; 500+ users.
- Implemented audio preview & MP3 download functionality; rated 5-star on Chrome Web Store.
- Leveraged Python to create a Flask API for the backend.

Software Engineer Intern at Vocallabs AI | Jun. 2026 – Aug. 2026

- Built a spam detection pipeline spanning an Android app and a Hasura-based backend, integrating telephony and phone number normalization logic.
- Contributed to VocalFlow, an open-source alternative to wisprflow.ai, building a native Windows port with real-time Deepgram streaming ASR and global hotkeys.

Software Engineer Intern at Humanness Inc. | Jun. 2023 – Jun. 2024

- Employed OpenAI API and Python to automate communications with clients.
- Designed Python web-scraping pipelines to collect essential backend data.
- Built custom NER models with spaCy and integrated OpenAI API for natural-language activity tracking.
- Managed structured user datasets with SQL for production deployment.

International Hackathons | Feb. 2018 – Oct. 2024

- Winner of 5+ international and school-level hackathons in AI/ML and healthcare.
- Organized and hosted an international hackathon with 150+ participants, secured $10K+ in sponsorships.

LEADERSHIP & COMMUNITY

Co-Founder – Uplift Youth Initiative | 2024 – 2025

- Taught 60+ underprivileged students computer literacy and digital skills; partnered with Dream India Initiative.
- Created a unique syllabus and practice approach for children who lack technology access.

Chair & Advisor – Coding Club | 2023 – 2025

- Mentored 30+ peers in programming, project development, and Python fundamentals.
- Guided peers on creating portfolios to display their experience.

Independent Computer Science Tutor | 2023 – 2024

- Taught introduction to computing, algorithms, problem-solving, and Python.
- Elevated students' performance (C → A*) in the IGCSE curriculum board examinations.

AWARDS

- UW Purple & Gold Merit Scholarship - $16,800 | Sept. 2025 – Jun. 2029
- Andy Grove Scholarship for Intel Employees' Children - $2,800 | Sept. 2025
